COMPACT MACHINE VISION FILTER TEST KIT FK200-27

The MidOpt FK200-27 Compact Machine Vision Filter Kit consists of 10 popular filters including UV, visible and infrared filters. Each filter is set into a filter mount with a M27 x 0.5 thread/pitch. Step adapter rings are supplied as well to accommodate M25.5 or M30.5 threaded lenses. The kit includes a polarizing filter and a polarizing film for the light source as well as a microfiber cleaning cloth. A booklet is also enclosed with technical data, transmission curves and educational material to help understand filter use.

- Excellent resource for testing.
- Test effects of different colored LED's in monochromatic imaging.
- Applications can be solved quickly.
- An essential tool for imaging solutions.
- Designed to assist vision integrators and end users to evaluate and improve image quality.
- Test before investing in hardware. Filters can determine type and color of lighting hardware which best satisfies the application's requirements.
- Control the variability of ambient light. Once appropriate lighting has been chosen, a complementary filter aids in correcting specific problems and in controlling the variability of ambient lighting conditions.

Includes:

- BP324-27 Near UV Bandpass
- BP470-27 Blue Bandpass
- BP505-27 Cyan Bandpass
- BP525-27 Light Green Bandpass
- BP550-27 Near IR/UV Block-Visible Bandpass
- BP590-27 Orange Bandpass
- BP635-27 Light Red Bandpass
- BP660-27 Dark Red Bandpass
- BP850-27 Infrared Bandpass
- PR032-27 Linear Polarizer
- PS007 Polarizing Film 125mm x 95mm
- SU25.5-27 M25.5 Step-Up Adapter
- SD30.5-27 M30.5 Step-Down Adapter
